

INVENTORY CONTROL: SYSTEMS & STRUCTURE

for Product-Retail Businesses

HOW IT WORKS

PHASE 1: CURRENT INVENTORY SITUATION ANALYSIS

- **Step 1a:** A **60-minutes consultation** session (physical or virtual) to understand the business' specifics, its current inventory challenges to be addressed, our proposed solutions and our action plan for upgrading your company's inventory management structure. [**Week 1**]
- **Step 1b: Stock count** conducted alongside client employee(s) to ascertain current stock levels, categorize stock correctly, need for POS systems etc. (NB. Cost for any POS systems hardware and setup required for physical stores are not included) [**Week 2**]

PHASE 2: INVENTORY PROCESS AUTOMATION + IMPROVEMENT

- **Step 2:** Automated **cloud inventory management system set up** (NB. software cost included, terms & conditions apply) [**Week 3-4**]
- **Step 3:** Definition & documentation of **operational inventory processes** (from order to delivery) [**Weeks 4-5**]
- **Step 4: Employee training & walkthroughs** on the inventory management system and the implementation of operational inventory processes [**Weeks 5-6**]

PHASE 3: POST-IMPLEMENTATION SUPPORT & ADVISORY

- **Step 5:** 3 months of **Inventory Audits** (post-employee training) as an added measure of control to ensure system is working, employees are adhering to processes and inventory is being safeguarded. [**Weeks 7-9**]

INVESTMENT

- **TOTAL PACKAGE: \$2000 (VAT inc.)** which covers:
 - up to 5000 items in stock
 - no more than 2 inventory locations (e.g. 1 storage & 1 shop floor)
 - training for up to 2 employees
- **Add-ons:**
 - \$150 per additional inventory location
 - \$100 per additional employee to train
 - \$50 per additional 100 items in stock
